

THE GOING-TO-THE-SUN ROAD PROJECT TRAVEL INFORMATION

For the week of July 30 - August 5, 2007

While alpine road work is occurring throughout the summer (mid-June to mid-September) 'shared use' of the entire 50-mile Going-to-the-Sun Road will be available, weather permitting. Construction crews are continuing masonry repair work approximately one mile above the Loop. Expected delays are identified in the box below.

Daytime travelers may experience up to 15-minute delays between 7 a.m. and 5 p.m. on Monday, July 30 through Friday, August 3. Traffic is reduced to one lane with flaggers in the construction zone. No week-end delays are anticipated. Vehicles larger than 10' high and 8' wide are discouraged from traveling through the construction zone because of the existing rock cuts. Please watch out for construction traffic.

PLEASE NOTE: July 1st through Labor Day, the new Glacier National Park shuttle system is available as an option for free transportation to locations along the road. Depending on the route, the buses depart every 15 to 30 minutes. The last buses leave Logan Pass at 9:30 pm. The shuttle system is not intended to accommodate large tour groups, which may need to separate into several buses and could lead to excessive delays for these groups. Stop by the Apgar Transit Center or St. Mary Visitor Center for additional information and park trip-planning resources.
